**Products Overview****HAND FILM SELECTIONS:****Sigma Classic Blown**

Best Selling, General Purpose, Hand Film for A,B & C Loads Make This the Simplest Solution for Hand Wrapping

- Competitively priced with both puncture & tear resistance plus great cling
- Instantly usable by both experienced and new employees
- Off-the-shelf availability when reorders are needed
- Wide range of standard sizes & gauges

Sigma World Wrap

The Thinner, Stronger Hand Film. An Excellent Choice for Most Common A&B Loads. The Clear and Quiet Hand Wrapping Solution.

- Cast co-extruded film
- Performs with less neckdown for better coverage using narrower widths
- Using narrower widths results in lighter rolls for ease of handling in application
- Crystal clear optics, with near silent un-wind

Sigma Extended Core

Cast Co-Extruded Hand Film That Makes Life a Little Easier

- Wound on 1-1/4" cores with 5" application handles
- Rolls are lightweight and easy to use in tight spaces
- No dispensers are required
- 20" wide web gets loads wrapped quicker with fewer trips around the pallet

Sigma Supreme

The Premium Grade Film Made With Special Orientation for a Stronger Film at Thinner Gauges.

- Low case prices and on-the-load cost
- Light weight rolls reduces wrapper fatigue
- Less film per load equals less stress on the environment

Sigma ecoSUPREME

The New Lowest Cost eco-Friendly Solution. Pre-stretched for Extra Strength. Engineered To Outperform All Competitive Hand Film – Regardless Of Gauge

- Light weight rolls packaged 4 rolls per case
- Reinforced edges provide unrivaled load holding force
- Superior puncture resistance
- Core extensions make ecoSUPREME easy to handle

Sigma Stretched

The Latest Innovation from Sigma Stretch Films. Pre-stretched for Extra-Strength and Better Yield

- Minimal neck down allows maximum coverage
- Light weight rolls reduces operator fatigue
- Reinforced edges reduces edge damage
- Bulk package, no boxes make Sigma Stretched eco-Friendly

MACHINE FILM SELECTIONS:**Sigma Select Cast**

Cast Co-Extruded Film That Excels in 90% of All Applications. The Simple and Economical Solution for Most Applications

- Provides optimal levels of stretch, strength, puncture resistance and cling while delivering exceptional load-holding force
- Clear optics and quiet unwind, plus ease of application on most machines
- Pre-stretch levels up to 250%

Sigma Magnum Cast

High Performance Film. Excellent for Down-Gauged or Higher Stretch Applications

- Cast, co-extruded from high-technology resins
- Provides optimum load-retention when pre-stretched from 250% to 300%
- Superior strength and stretch characteristics means minimum film usage and maximum load-holding force
- Excellent machinability in all applications including overhead and high speed equipment

Sigma Summit Cast

Ultra-Premium, One Side Cling Film. Used in Special Applications to Prevent Pallets From Sticking to Adjacent Pallets

- Cast co-extruded, this premium grade film provides exceptional load-holding force
- Pre-stretch levels up to 250%
- Delivers the optimal strength, puncture resistance and cling you expect from Sigma Stretch Film
- Easy unwind for high speed automatics, overheads, and bundling applications
- Your best choice for those demanding applications

Sigma Secure Blown

Blown Machine Film That Offers Toughness, Strength, Superior Puncture and Tear Resistance and Our Highest Load-Holding Force

- Designed to conquer the challenge of hard-to-hold "C" type loads
- Excellent choice for overhead wrapping applications
- Provides enhanced protection for regular "A" or "B" type loads with up to 250% pre-stretch and superior cling
